

### **Short courses on existing or new legislation**

Expede's vision is to keep learners informed of the changes in the Financial and Insurance Industry. Whenever there are changes to existing legislation or new legislation being proposed Expede creates a short course to inform and keep learners up to date.

These courses are communicated via our database to all existing learners and placed on the website under "Upcoming Training".

**Target Audience:** All management, key individuals and representatives.

**Programme:** The purpose of these programmes is to give an overview of the change in legislation or provide basic guidelines on the new legislation being proposed.
